GANESH SONAWANE

AI Developer | Generative AI Engineer | Backend Engineer

Pune, Maharashtra, India • +91 9373519234 • ganeshsonawane39773@gmail.com • LinkedIn • GitHub

PROFESSIONAL SUMMARY

AI Developer and Computer Engineering graduate with hands-on experience in Machine Learning, Generative AI, Large Language Models (LLMs), and AI-powered application development. Experienced in building intelligent systems using Python, TensorFlow, Scikit-learn, OpenCV, Flask, and modern AI frameworks. Skilled in developing REST APIs, RAG pipelines, AI chatbots, automation tools, and deploying AI solutions using Docker and CI/CD. Passionate about solving real-world problems through Artificial Intelligence and scalable software engineering practices.

TECHNICAL SKILLS

Languages	Python, Java, C++, JavaScript, C
AI & ML	Machine Learning, Deep Learning, Generative AI, Prompt Engineering, LLM Integration, RAG, Computer Vision, NLP
Frameworks	TensorFlow, Scikit-learn, OpenCV, Pandas, NumPy, Flask, FastAPI
Databases	MySQL, PostgreSQL, MongoDB
DevOps	Docker, Git, GitHub, CI/CD, Linux
Core CS	Data Structures & Algorithms, OOP, REST API Development, SDLC, Agile Methodologies

PROFESSIONAL EXPERIENCE

AI/ML Developer Intern

Blue Planet Info Solution Pvt. Ltd., Pune | *Oct 2025 – April 2026*

- Developed AI-powered backend applications using Python, Flask, and FastAPI.
- Designed REST APIs for machine learning and Generative AI integrations.
- Built data preprocessing and feature engineering pipelines using Pandas and NumPy.
- Assisted in developing LLM-based applications and AI workflow automation.
- Containerized AI applications using Docker and supported CI/CD deployment pipelines.
- Collaborated with cross-functional teams in Agile development environments.

Data Science & AI/ML Intern

YBI Foundation | *Oct 2024 – Nov 2024*

- Developed machine learning models using Scikit-learn for predictive analytics.
- Performed data cleaning, transformation, and visualization using Pandas.
- Built Flask APIs for integrating ML models into applications.
- Managed datasets using MySQL and SQL-based data analysis.
- Documented model performance and project outcomes.

PROJECTS

AI Doctor Chatbot — *Python, Flask, LLM, RAG, REST APIs*

- Developed an AI-powered healthcare assistant capable of answering medical queries.
- Integrated Large Language Models with Retrieval-Augmented Generation (RAG).
- Built scalable REST APIs for real-time interactions.
- Implemented structured context retrieval to improve response accuracy.

Wild Eye AI – Wildlife Detection System — *Python, TensorFlow, OpenCV*

- Developed a computer vision system for wildlife detection and classification.
- Created image preprocessing and model training pipelines.
- Achieved over 90% prediction accuracy through model optimization and augmentation.
- Built an end-to-end AI workflow from training to deployment.

AI Presentation Generator — *Python, GPT APIs, Docker*

- Built an AI-powered presentation generation platform using GPT models.
- Automated slide content creation from user prompts.
- Containerized the application using Docker and integrated CI/CD workflows.
- Reduced manual presentation creation effort by approximately 80%.

Digital Wallet System — *Python, Flask, MySQL*

- Developed a secure transaction management system.
- Implemented fund transfer, authentication, and transaction tracking features.
- Applied database transaction handling using commit and rollback mechanisms.
- Designed REST APIs for wallet operations and account management.

EDUCATION

Bachelor of Technology – Computer Engineering

Dr. Babasaheb Ambedkar Technological University | *2022 – 2025* | *CGPA: 6.81 / 10*

Diploma in Computer Engineering

Shri Gulabrao Deokar Polytechnic, Jalgaon | *2019 – 2022* | *73%*

CERTIFICATIONS

- Oracle Cloud Infrastructure Generative AI Professional (OCI)
- AI Fluency – Anthropic
- McKinsey Forward Program - 2025
- Linux & DevOps Certification
- Google GenAI Exchange Program (Vertex AI, Gemini, Imagen)

ACHIEVEMENTS

- Google GenAI Exchange Program (Vertex AI, Gemini, Imagen).
- Built multiple end-to-end AI applications involving LLMs, Computer Vision, and Automation.
- Developed production-ready AI APIs and backend systems.
- Experience with Docker, Git, Linux, and CI/CD for AI deployment.
- Strong understanding of Generative AI, Machine Learning, and Software Engineering best practices.
